

Training Course

Many vessels are navigating the seas by the use of EMRI steering systems, Autopilots and other navigational equipment.

As EMRI has been in the business for more than 45 years, we acknowledge the demand for trained service engineers who can take good care of our systems and make sure vessels continue to maintain excellence in ship control. Therefore, we conduct training courses upon request and encourage everyone to come visit us for a short and intense introduction.

A typical training course at EMRI

Introduction to the most commonly sold servo types – RCU, RCY

Introduction to Autopilots – SEM200 & SEM300

Free lunch and drinks during the course

Course certificate for participants

2-4 participants

Note: We can adjust the training to your specific needs if requested

We can help with the planning by providing city maps, list of nearby hotels etc.
